DOWNLOAD THE PLACEHOLDER

the placeholder pdf
Essentially what I'm looking to do is take details from a web form, which will be taken to populate a PDF template. At the moment I reckon the best way is to create a PDF template with placeholders, e.g. [[clientname]], find that reference in the PDF then swap it with what we have in the form.

php - Change placeholder in PDF - Stack Overflow
Placeholders can be used to reference metadata and insert this metadata in headers or footers and on static pages (for example titlepages, toc, etc.).

Using Placeholders - Scroll PDF Exporter - K15t Software
If there is a placeholder in the PDF tab of the Document Viewer, click on the Original tab to download the file in native format. The file can be opened locally if the associated application is installed on the local computer and the file is otherwise accessible.
