Measuring the Triad of Positive Emotional Strengths Positive mental health is more than the absence of psychological symptoms. This article focuses on positive indicators of strength, including measuring gratitude, life satisfaction, and hope.

National Association of School Psychologists (NASP)

Violence is defined by the World Health Organization as "the intentional use of physical force or power, threatened or actual, against oneself, another person, or against a group or community, which either results in or has a high likelihood of resulting in injury, death, psychological harm, maldevelopment, or deprivation," although the group acknowledges that the inclusion of "the use of ...

In psychology, desensitization is defined as the diminished emotional responsiveness to a negative, aversive or positive stimulus after repeated exposure to it. It also occurs when an emotional response is repeatedly evoked in situations in which the action tendency that is associated with the emotion proves irrelevant or unnecessary.
